

Put yourself at the forefront of meaningful innovation

At Philips, we believe technology should be advanced but simple at the same time. It should make sense and be designed around the way people live and work.

We recognized your talent. You recognized our efforts.

The Intermediar Image Survey 2012, yet again, reported that the majority of young professionals surveyed in the Netherlands regard Philips, as the number-one industry sector employer. This is something we're extremely proud of, because it stands proof that we are offering them what they want: accelerated career progression, real challenge, ample reward, and a stimulating environment. If you are the one who ranked us highly, we thank you whole-heartedly for your support.

Technical Project Manager

If you have a technical mind and possess excellent project management skills, seize this opportunity within Philips – Consumer Lifestyle. You require minimum 5 years of engineering and managerial experience in technical product development. Stand a chance to steer big projects from ideation to its launch. **Job ID: 81082**

Intellectual Property Counsel

Do you have the legal, commercial, and technical skills to turn IP into assets that support the growth, profitability, and competitiveness of Philips' businesses? Can you think 'out-of-the-box' to create new business models and opportunities, for exploiting intellectual property rights? If the answer is yes, then joining Philips Intellectual Property & Standards (IP&S) as an IP Counsel is an opportunity to accelerate your career in one of the world's largest and best known industrial IP organizations. **Job ID: 012430**

Senior Mechanical Designer Lifecycle Management

Does configuring, managing, and maintaining advanced Mechatronic systems sound ideal to you? Then, you are the perfect person to be part of the Mechatronics department at Philips. Head a team of junior designers and implement futuristic designs. 5 – 10 years of mechanical design experience preferred. **Job ID: 005611**

Electronic System Architect

As an electronic system architect, you will define and design the structure of the software and hardware systems to be developed. Apply your knowledge of electrical engineering to develop the SW/HW interfaces. Challenge your technical prowess and exhibit your excellence. **Job ID: 017445**

Agile Transformation Manager

Transform your career by being the next Agile Transformation Manager. Define, implement, and improve agile output based project management methodology within Philips IT delivery. Along with a Masters in Business Administration, Lean/Six Sigma training is required. Lean/Six Sigma Black Belt preferred. **Job ID: 014201**

Senior Technologist Control

Accelerate your career within the control domain of Mechatronics development projects. If you are a Ph.D. or M.Sc. in control systems and have a passion for technology, an international and multidisciplinary environment awaits you. 5-10 Years of experience needed. **Job ID: 005580**

Senior Production Engineer

If you have an aptitude for Statistical Process Control and Lean Manufacturing, we have an opportunity for you. As a Senior Production Engineer, you are responsible for improving and optimizing production. Wear your technical hat and contribute to the growth of new production processes. **Job ID: 16900**
